

KAVYANJALI KULUKURI

Artificial Intelligence & Data Science | Full Stack Development

kavyakulukuri@gmail.com | 9014959436 | [linkedin.com/in/kavya-kulukuri](https://www.linkedin.com/in/kavya-kulukuri) | github.com/Kavyakulukuri

PROFESSIONAL SUMMARY

Recent B.Tech graduate in Artificial Intelligence & Data Science with hands-on experience in machine learning, deep learning, and full stack web development. Proficient in Python, TensorFlow, Scikit-learn, React.js, Node.js, and Flask. Built 4 end-to-end projects spanning CNN image classification, AI chatbots, voice emotion detection, and RESTful web apps. Seeking an entry-level AI/ML Engineer, Data Science, or Software Engineer role.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML, CSS

Machine Learning & Deep Learning: Supervised & Unsupervised Learning, Classification, Regression, CNNs, TensorFlow, Keras, VGG16 Transfer Learning, Feature Engineering, Hyperparameter Tuning, Model Evaluation

Data Science: NumPy, Pandas, Scikit-learn, Librosa, Data Visualization, Power BI

Web & Backend: React.js, Flask, REST APIs, MERN Stack, CRUD Operations

Databases & Tools: MongoDB, SQL, SQLite, Git, GitHub, Jupyter Notebook, VS Code, Postman

EDUCATION

B.Tech – Artificial Intelligence & Data Science | 2022 – 2026

Kakinada Institute of Engineering and Technology, Korangi | CGPA: 7.3 / 10

Intermediate (MPC) | 2020 – 2022

Sri Chaitanya Junior College, Visakhapatnam | 70%

INTERNSHIPS

AI & ML Intern – AICTE EduSkills | Jul 2024 – Sep 2024

- Trained and evaluated 5+ ML models (classification & regression) using Python, TensorFlow, and Scikit-learn; optimized performance via feature engineering and hyperparameter tuning.
- Implemented a 3-stage data pipeline (preprocessing → feature engineering → tuning); measured results using accuracy, precision, recall, and F1-score metrics.

Web Full Stack Intern – AICTE EduSkills | Oct 2024 – Dec 2024

- Developed 2 MERN stack web applications (MongoDB, Express.js, React.js, Node.js) with full CRUD functionality and RESTful API integration.
- Built responsive React.js frontends connected to Node.js/Express.js backends; maintained Git version control and clean code documentation throughout.

PROJECTS

Voice Recognition & Emotion Detection System | 2024

GitHub: github.com/Kavyakulukuri/voice-recognition-project

- Engineered an AI voice emotion detection system extracting MFCC features via Librosa and classifying emotions (happy/sad/angry/neutral) using a Scikit-learn model trained on the RAVDESS dataset.
- Built a Python Flask backend with an HTML/CSS/JS frontend to display real-time emotion predictions; persisted the trained model using Joblib.

Fish Disease Detection Using Deep Learning (VGG16) | 2024

GitHub: github.com/Kavyakulukuri/fish-disease-detection

- Built a CNN image classifier using VGG16 transfer learning (TensorFlow/Keras) to detect freshwater fish diseases; applied image augmentation and label encoding on a Kaggle dataset.
- Integrated the model into a Flask web app backend accepting uploaded fish images and returning real-time disease predictions.

Heart Disease Chatbot | 2026

GitHub: github.com/Kavyakulukuri/heart-disease-chatbot

- Developed an AI health chatbot with Groq API (LLaMA 3.3 70B) answering queries on heart disease symptoms, prevention, and diet; integrated SQLite-based chat history and user authentication.
- Full stack solution: Flask backend + HTML/CSS/JS frontend with secure environment-variable API key management.

TaskFlow – Full Stack Task Management App | 2025

GitHub: github.com/Kavyakulukuri/taskflow-todo-app

- Architected a full stack app with Flask (RESTful backend), SQLite (database), and vanilla JS frontend featuring CRUD operations, debounced search, status filtering, and a real-time progress bar.

CERTIFICATIONS

- Foundations of Modern Machine Learning – IIIT Hyderabad
- Basics of Python – Edyst
- TechSaksham AI Program – Edunet Foundation

ACHIEVEMENTS & LEADERSHIP

- Runner-up at EduNet TechSaksham Regional Showcase among 500+ participants across the region.
- Team Lead in 3+ college-level AI & Full Stack hackathons; led teams to deliver working prototypes under tight deadlines.
- Student Coordinator – Deeksharambh Orientation Program at KIET; managed onboarding for 200+ students.
